Dear Administrator,
We would like to extend our sincere thanks for the support you have provided the 2011 Census to date. In addition to the 2011 Census, one in three households across Canada are also asked to participate in the new **National Household Survey (NHS)**. Information previously collected by the long-form census questionnaire is now collected as part of this new survey.

The NHS gathers information on a wide variety of topics including:

- demography
- activity limitations
- citizenship and immigration
- language, language of work
- ethnic origin, population group, place of birth of parents
- Aboriginal group, Registered or Treaty Indian status, member of a First Nation/Indian band • religion
- mobility
- education
- labour market activities
- place of work
- Mode of transportation, car-pooling
- child care and support payments
- income
- housing

The NHS is very important because it will provide your community the information it needs to plan services such as child care, schooling, family services, housing, roads and public transportation, and skills training for employment. The data are also used to support government programs directed at target populations, such as immigrants, Aboriginal populations, lone-parent families and seniors.

Please encourage everyone who has been selected to respond to this survey. You can help us get the word out by:

- issuing a press release to local media from the mayor on the NHS
- including a message in your newsletter or e-bulletins (attached)
- placing a web button on your website (attached), linked to www.nhs.statcan.gc.ca
- following us on Twitter (@statcan_eng) and re-tweeting NHS messages

DID YOU KNOW: both the NHS and the 2011 Census questions have been translated into 31 different languages, which are available online here: http://nhs.statcan.gc.ca/nhs-enm02/nhs-enm02_000-eng.htm.

The success of the NHS depends on your support and the participation of residents in Canada.

Important notice to all residents of Canada

In addition to the 2011 Census, one in three households will be asked to participate in the new National Household Survey (NHS). The information collected in the NHS will provide data needed to plan and support family services, housing, roads and public transportation, and skills training for employment.

Your information will help paint a detailed and comprehensive picture of Canadian society. If you receive the NHS, support your community and complete the survey.

The NHS will collect the same information that was collected by the 2006 Census long-form questionnaire. For information to be available for future planning and decision making, it is important that all residents who receive the NHS complete the questionnaire. Please encourage all residents to respond to this survey.

The National Household Survey and your community ... working together

The National Household Survey is coming!

In May and June 2011, one in three households across Canada will be asked to participate in the new National Household Survey (NHS).

What is the National Household Survey?

To complement the census, the government has asked Statistics Canada to conduct the NHS.

NHS data are used to:

- support government planning and program delivery, including family services, housing, roads, public transportation, and skills training for employment
- provide data to support government programs directed at target populations, such as visible minorities, lone-parent families and seniors
- support research by academics and the media.

Confidentiality of information

The confidentiality of every NHS form is protected by law. This means that only Statistics Canada employees who have taken an oath of secrecy who work directly with NHS data will see the completed questionnaires.

Online questionnaires

Households have the option of completing their NHS questionnaire online. It is easy, secure and convenient. No pre-registration or lengthy download processes are required.

Trends from the 2006 Census

- More than two-thirds of Canadian households (68.4%) owned their dwelling in 2006, the highest rate of homeownership since 1971. Of the 12.4 million households in Canada, more than 8.5 million owned their home.
- In 2006, an estimated 3 million households, or 24.9% of the total, spent 30% or more of their income on shelter.

- One of the trends pushing up family earnings among couples with children has been a steady increase in the share of these families in which two persons or more worked full time, for the full year. Between 1980 and 2005, the proportion of these families in which two persons or more worked full time full year nearly doubled, from 21.5% to 38.4%.
- The 2006 Census confirmed that higher education is a gateway to higher earnings, as did all previous censuses. For men and women of all ages, full-time full-year earners with a university degree earned substantially more than their counterparts who did not have a high school diploma.
- The 2006 Census counted 289,400 mixed unions (marriages and common-law unions) involving a visible minority person with a non-visible minority person or a person from a different visible minority group. This was a 33.1% increase from 2001, more than five times the increase of 6.0% for all couples.
- People whose mother tongue is neither English nor French (allophones) numbered more than 6 million in 2006. The increase rate of allophones between 2001 and 2006 was 18%, the highest five-year growth rate since the 1986 to 1991 period.

The NHS will provide a portrait of communities in 2011. It will provide a reference for decision makers not only at a federal and provincial level, but in your community too.

Harbour Authority
Port McNeill Municipal and Federal Harbour

Dear Mayor and Town Council,

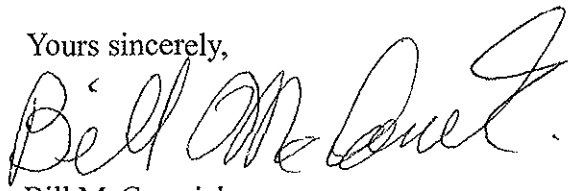

On behalf of the Canadian Coast Guard Auxiliary Unit 50 (Port McNeill), we request Grants In Aide for the following:

- 1) Moorage space on the inside of the calm water off-load dock to moor a 7.33 meter, high speed, rescue craft.
- 2) Use of the old marina office to store rescue gear such as cruiser suits and helmets, three marine, hand held radios, hypothermia blanket, man overboard pole and charts of the immediate area.
- 3) Permission for Coast Guard Auxiliary members to park their vehicles on harbour property for training sessions and when dispatched on search and rescue missions. These vehicles would be marked with a CCGA sticker or a parking pass noted as CCGA Unit 50 if the member does not already possess a harbour parking pass.

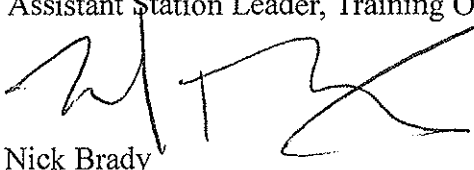

The rescue vessel arrives on June 26th with trailer and will respond to local and visiting vessels in distress. We will be working in conjunction with the 508 Coast Guard vessel out of Telegraph Cove.

Much of the water time will be training of new crew to become familiar with manoeuvring the vessel, search and rescue techniques and high speed runs. The vessel is a loaner from Nanaimo and will be stationed here for three to four months. In the future, we look forward to a permanent Port McNeill vessel so that Unit 50 can assist boaters in our local waters.

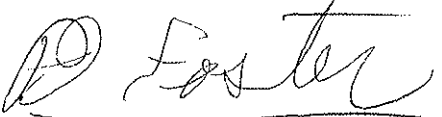

Yours sincerely,
